

BrainCave Software Pvt. Ltd.[®]
EMPOWERING MINDS, INSPIRING INNOVATION!!

Empowering Minds, Inspiring Innovation!

Company Portfolio

Introduction

BrainCave Software Pvt. Ltd. is a forward-thinking technology solutions company dedicated to building innovative and scalable digital platforms for modern businesses. Established in April 2022, the company is headquartered in Kolkata, establishing operations in Jharsuguda, while also building an international footprint with branch offices in Singapore and the United States., enabling it to serve clients across both domestic and global markets.

Under the visionary leadership of Chandan Das, BrainCave Software has rapidly evolved into a dynamic force in the technology ecosystem, consistently redefining industry benchmarks and pushing the boundaries of innovation. Backed by a team of 30+ skilled professionals, the company has successfully delivered 37+ global projects across diverse industries.

BrainCave specializes in software development, web and mobile application development, enterprise platforms, cloud infrastructure, artificial intelligence, and custom digital solutions. The company is also known for building advanced products such as Lucent ERP, designed to streamline business operations, enhance analytics, and empower organizations with data-driven decision-making.

With a strong focus on innovation, security, and scalability, BrainCave Software collaborates with startups, enterprises, and government organizations to accelerate digital transformation. By combining technical expertise with a customer-centric approach, the company continues to deliver impactful technology solutions that help businesses operate smarter, faster, and more efficiently in today's digital economy.

Our Foundation Story

The journey of BrainCave Software Pvt. Ltd. began in 2021 with a small but ambitious vision to build impactful technology solutions. Initially, the venture started as a non-registered technology initiative named Tech Binary, operating with just two dedicated professionals focused on delivering software and digital services to emerging businesses.

As the team gained momentum and projects started growing, the founders decided to formally register the company. However, during the registration process, it was discovered that the name Tech Binary was already registered with the Ministry of Corporate Affairs. Several alternative names such as Tech Swift Binary and Tech Binary Software were proposed, but they were not approved during the company name registration process.

This challenge led to the creation of a completely new identity—BrainCave Software Pvt. Ltd., which was officially established and registered in April 2022 in Kolkata under the leadership of Chandan Das.

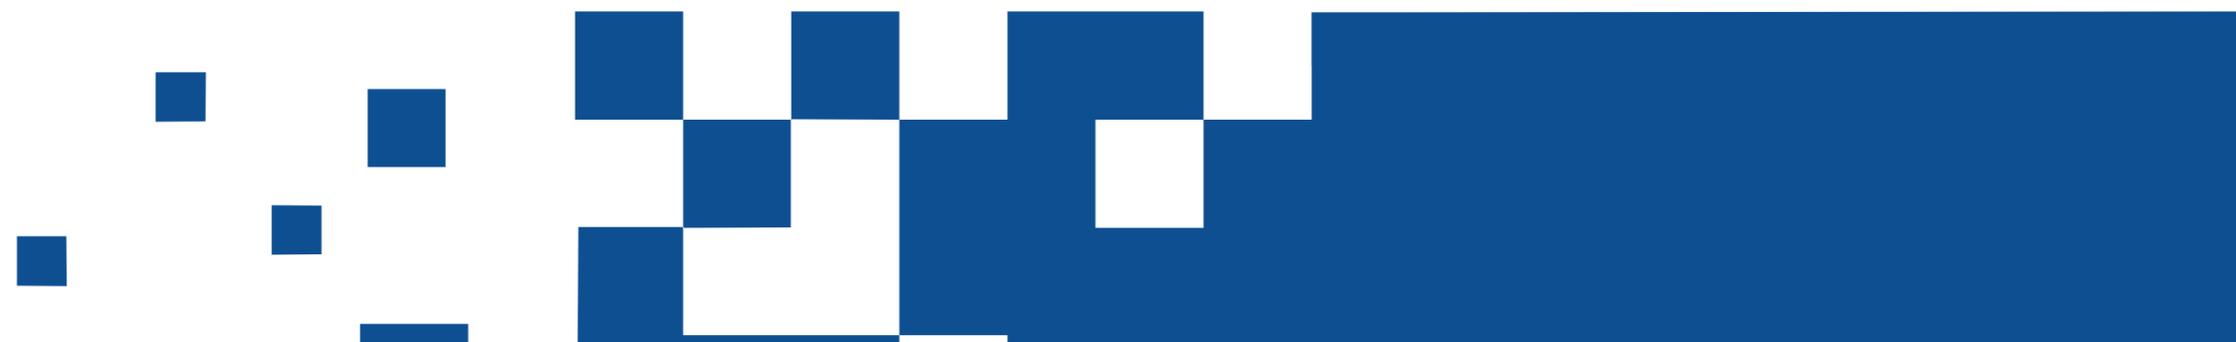

Following its formal incorporation, the company rapidly strengthened its credibility and ecosystem. BrainCave Software was successfully recognized under Startup India and registered as an MSME enterprise. The company also adopted global operational standards by becoming an ISO-certified organization, reinforcing its commitment to quality, security, and structured processes.

The year 2022 marked a major expansion phase for BrainCave. The company established its first branch office and began expanding its reach into international markets, serving clients beyond India.

The growth trajectory continued steadily:

- 2023 – BrainCave expanded globally by establishing its second branch office in the United States, strengthening its international presence.
- 2024 – BrainCave Software became part of the BrainCave Group, alongside other subsidiary companies, creating a diversified ecosystem of technology, products, and services.
- 2025 – The company further strengthened its domestic footprint by opening a branch office in Jharsuguda.

From a two-member startup in 2021 to a growing technology organization serving clients across multiple regions, the journey of BrainCave reflects persistence, innovation, and a strong commitment to building technology that empowers businesses. Today, BrainCave continues to evolve as a dynamic tech company focused on delivering scalable software solutions, enterprise platforms, and next-generation digital innovations.
